Clean & Beautiful Neighborhoods Overview

The City of Miami has developed an international reputation for its natural beauty, strong urban design, and rich cultural diversity. Creating and sustaining beautiful and vibrant communities is one of the major priorities for the City. Clean and beautiful neighborhoods, with well-maintained infrastructure, enhance residents’ quality of life and economic development. Furthermore our focus on sustainability will help the City remain one of the cleanest, environmentally-friendly and top tourism destinations in the world.

CLEAN & BEAUTIFUL

NEIGHBORHOODS

2016 Clean & Beautiful Neighborhoods Update

Keeping Miami Beautiful and clean is an important priority of the strategic plan. With this in mind, the City has engaged in a variety of activities to clean, beautify and reduce environmental issues. This year Solid Waste, NET, Code enforcement and Communications worked together on the Keep Miami Beautiful campaign. Through this campaign, the City conducted clean-ups in different neighborhoods, installed cameras to capture illegal dumping and educated the public on recycling. Repairs and enhancements were also completed to make the City resilient to environmental conditions and improve existing infrastructure. Among the initiatives accomplished this year were the modernization of pump stations, drainage improvements and a solar street lighting pilot program. In the next year, the City plans to keep addressing illegal dumping issues with an emphasis on education, public engagement and increased monitoring. In terms of sustainability, the City has created an Office of Resilience & Sustainability to develop a regional resilience strategy along with Miami Beach and Miami-Dade County.

Achieved Goals

- Conducted 53 clean-ups and installed cameras to capture illegal dumping as part of Keep Miami Beautiful Campaign
- Completed approximately \$1.5 million in drainage enhancements
- Commenced a pilot program of Solar Powered Street lighting to reduce environmental impact and lighting related energy costs
- Completed the modernization and improvements to Lawrence and Riverview pump stations

Data Summary

Key variances indicate the community is advancing in maintaining beautiful, vibrant, and sustainable neighborhoods. Data from the U.S. Census Bureau reveals that there was a slight drop in vacant housing units in the City which contributes to invigorating economically challenged neighborhoods within the City. The City's annual citizen survey also shows that less residents are observing code violations. Residents and businesses are taking more of a role in the beautification of their communities through participation in clean-up events and recycling.

The City should continue to work toward maintaining streets and public spaces to a high standard and continue to promote livable and sustainable communities through the built environment and public spaces.

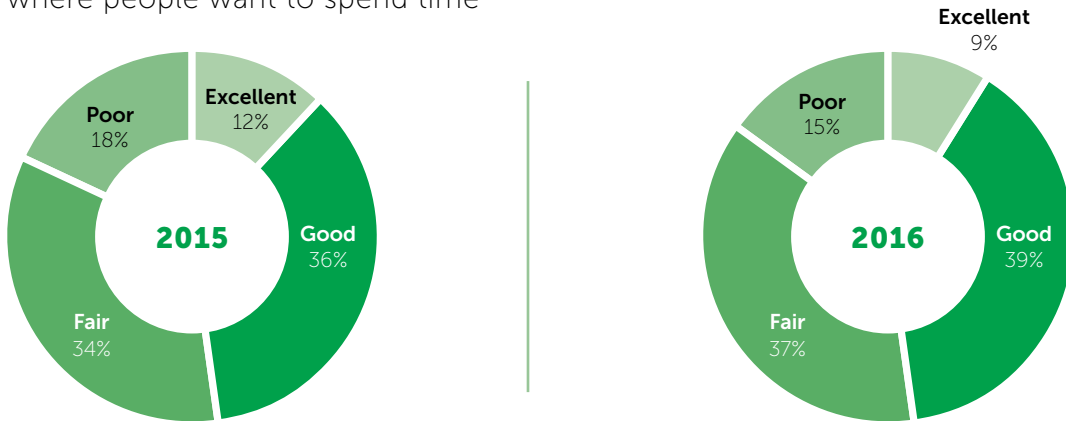

Related strategies include: *Promote development of complete streets with an emphasis on safety, security, and accessibility; increase parks and open space; increase recycling within the City through aggressive outreach and strategic partnerships.*

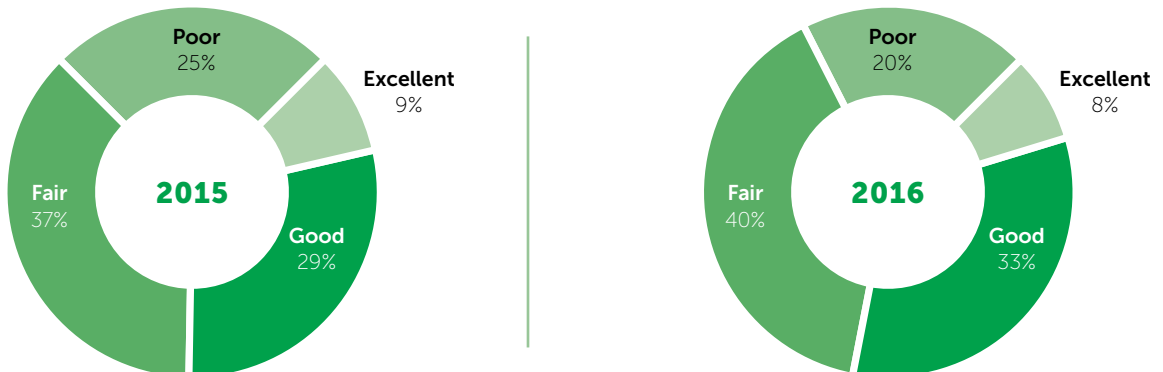

Planning & Zoning employees participate in an Earth Day event at Legion Park on April, 2016.

Objectives + Strategies

PROMOTE LIVABLE AND SUSTAINABLE COMMUNITIES

Support the development of vibrant and active communities with a high quality of life

Sample Strategies:

- Promote development of complete streets with an emphasis on safety, security and accessibility
- Promote development that increases access for elderly residents and persons with disabilities in Miami's communities
- Increase parks and open space

MAINTAIN STREETS AND PUBLIC SPACES TO A HIGH STANDARD

Ensure the cleanliness and good condition of the City's streets, sidewalks, medians, and other public spaces

Sample Strategies:

- Coordinate neighborhood service delivery across City departments
- Increase the number of trash cans on commercial corridors
- Assign street sweepers to clean all major corridors

PROMOTE ENVIRONMENTAL SUSTAINABILITY AND RESILIENCE

Position the City as the regional leader in environmental sustainability and promote local awareness of sustainability, conservation, and resilience issues

Sample Strategies:

- Increase recycling within the City through aggressive outreach and strategic partnerships
- Implement sustainable practices in City operations
- Promote best practices in conservation of natural resources
